FORWARD

Disaster is a sudden, extremely unfortunate event that affects many people. A major disaster is primarily an incident which causes or threatens multiple deaths and injuries or severe disruption and which is beyond normal capacities of Fire, Police and Ambulances Services. Taking into consideration the immense damage caused by natural disaster, it is necessary to take concerted action for reduction of loss of life and property damage and social and economic disruption caused by natural disasters. Disaster Management is a dynamic process involving many organizations which must work together to prevent, prepare for, respond to and recover from the effects of disasters. In short, every organization must have concern for minimizing the adverse impact of the disaster on people through preparedness and by bringing in the right technology to bear in a timely, coordinated and effective manner. The Directorate of Fire & Emergency Services provides timely assistance to the people in distress. Historically disaster management are assigned to Fire Services by virtue of the equipments and man power available with them for such response. The detail information about the department, equipments and manpower available for disaster response is included in this booklet.

OBJECTIVES OF THE PLAN

The Primary objective of the Disaster Management Plan is:

- To provide for modalities of Co-ordination among all participating responders at all levels of the Department.
- To take prompt action to save valuable lives and property in the U.T. of Dadra & Nagar Haveli.
- To provide rescue and relief work.
- To instill confidence to tackle any crisis situation that may arise.
- To handle such an emergency efficiently.
- To have meticulous planning, regular practices and mock drills, keeping the existing facilities available in proper working condition.
- To coordinate the actions of the personnel's of the Department and to evolve policies for cooperation among the various participating organizations.
- To bring the incident under control within shortest possible time.
- To ensure normalcy within shortest possible period.

ORGANIZATION AND CONTROL

The U.T. Administration of Dadra & Nagar Haveli and Daman & Diu, Silvassa Fire and Emergency Services constituted under the Goa, Daman & Diu Fire Force Act 1986 is headed by the Dy. Inspector General of Police, Daman & Diu who is designated as Director of Fire & Emergency Services assisted by the Asstt. Divisional Fire Officer. Besides fulfilling the main objectives of fire prevention, fire protection, fire-fighting and rescue, the department generally attends emergency calls which are not directly connected with fire, in order to help the people in distress. Over the years it has attained a multi-dimensional role in saving and protecting life and property of the people with its activities in fire prevention, fire protection, fire suppression and training. The department is being developed to provide effective fire and emergency cover to the people and property in the U.T.

The sanctioned strength of the Dadra & Nagar Haveli Fire & Emergency Services is 60 including officers. It provides round the clock duties with the set up of 02 fire stations situated at Silvassa and Khanvel. Each Fire Station is headed by Station Fire officer/Officer-in-charge, who are being supervised by the Asstt. Divisional Fire Officer located at Somnath, Nani Daman for operational and administrative purpose.

HOW TO CONTACT FIRE BRIGADE

अग्निशमन दल को कैसे बुलाया जाय

याद रखिए कि आग लगने पर प्रत्येक मिनट कीमती होती है ।

आग लगने पर 101 या 100 नंबर पर डायल करें या अपने निकटतम अग्निशमन केन्द्र से सम्पर्क करें ।

आग लगने का स्थल पहचानने के लिए आपका नाम, पता, दूरभाष नंबर एवं सीमा चिन्ह बताएँ ।

आग किस प्रकार की है और कौन सी जगह पर है ।

दूरभाष का रिसिवर पकड़ कर रखें और प्रत्युत्तर का इंतज़ार करें ।

शांति एवं धैर्य से सब प्रक्रिया को पूर्ण करें ।

झूठी कॉल ना करें, क्योंकि इससे जरूरतमंद लोगों की कॉल में विलंब होगा, जो आपके रिश्तेदार एवं मित्र भी हो सकते हैं।

RESPONSE ACTION

ROLE & RESPONSIBILITIES:-

1. LOCAL FIRE STATION (LFS) / FIRST RESPONDER

When the Local jurisdiction in any of the two Districts is affected by any fire and emergency situation, the Local Fire Station in the respective District will be the First Responder. The First Responder shall take the following action:-

- The Local Fire Station will dispatch Fire Tender or Emergency Tender (which includes Fire Fighting Personnel and equipment) to the incident site based on the type of incident reported in the respective Fire Station.
- The First Responder will make an on-scene assessment of the incident (nature, magnitude and other details) and inform the respective Watch Room, who in turn will inform the Headquarters Fire Control Room on an on-going basis to the extent possible.
- The Watch Room of the Local Fire Station will simultaneously communicate the information of the incident to the Assistant Divisional Officer.
- The First Responder may seek assistance from the neighbouring Fire Stations as per the standard protocol and from other mutual aid agencies, as may be required based on the progress and status of the incident.
- The First Responder shall provide information to the Headquarters Fire Control Room to extent possible by communication facilities available with them;
- The First Responder Team shall leave the scene of the incident only after the situation has been fully brought under control.
- Officer-In-Charge shall inform the Asst. Divisional Fire Officer and Headquarter Fire Control Room about the incident.
- Officer-in-Charge will seek assistance from Headquarters Fire Control Room/Mobilizing Officer depending upon the extent of disaster.

2. WATCH ROOM OF LOCAL FIRE STATION

- ▶ On receiving any information of any disaster in the jurisdiction of particular Fire Station, Watch Room Operator/In-Charge of Watch Room of that particular Fire Station will immediately bring the fact to the notice of the Station Fire Officer/Officer-In-Charge of the Station, subsequently on the direction of the Station Fire Officer/Officer-In-Charge, he will immediately inform the Headquarters Fire Control Room through quickest possible means and inform the duty officer/Station Fire Officer/Officer-In-charge of the Station to immediately rush to the spot with specific equipments, appliances, facilities available with them to tackle the situation for effecting search, rescue and fire fighting operation, but in the event of a major disaster situation arising in the jurisdiction of a Fire Station, the Station Fire Officer/Officer-In-Charge shall immediately alert the District level Control Room/Police Control Room.
- ▶ With the help of Officer-In-Charge on the call spot, the Watch Room Operator will verify the extent of disaster and start reporting the situation to the Headquarters Fire Control Room.

3. HEADQUARTERS FIRE CONTROL ROOM

The Headquarters Fire Control Room at Somnath, Nani Daman upon receipt of information of the incident either directly or through other channel of communication of the on-scene and near-scene assessment, will take the following action:

- ▶ The HQ Fire Control Room shall act as a Nodal Agency to coordinate fire fighting and response action.
- ▶ Mobilize Fire Tender / Emergency Tender from the nearest Fire Station to the affected site as per Disaster Management Response Plan (DMRP).
- ▶ Mobilize reinforcement/Specialized equipment, if needed, and other support services to the area/scene to assist in the controlling of the incident;
- ▶ Alert other response agencies such as Medical, Police for support that may be required;
- ▶ Provide information to the superior officers of the Fire & Emergency Services based on on-scene information available through the First Responder Team.

4. NEIGHBOURING FIRE STATIONS

Upon being informed by the HQ Fire Control Room, Fire Stations located away from the scene of incident will;

- ➡ Move to alert and ready status.
- ➡ On advise of the HQFS, shall;
- ➡ Start moving resources and personnel towards the scene of incident.
- ➡ Report to the Incident Controller Officer (ICO) engaged in the on-scene response.
- ➡ Co-ordinate as per instructions of the ICO.

5. STATION FIRE OFFICER/OFFICER-IN-CHARGE (Incident Control Officer)

He shall be the incident control officer on the call spot and shall communicate minute to minute information from the call spot to the Asst. Divisional Fire Officer who in turn will inform the Director, Fire & Emergency Services depending upon the extent of disaster and shall assess the situation in terms of:-

- ➡ a) Nature of situation and extent of damage
- ➡ b) Type of Incident/services/minor/major/medium.
- ➡ c) Other potentially vulnerable area.
- ➡ d) Approximate persons effected.
- ➡ e) Search, Rescue & Fire Fighting Operations to be undertaken.
- ➡ f) Information to be send to the Watch Room, Asst. Divisional Fire officer.
- ➡ g) Information to be provided to the Police Control Room where necessary.

6. ASSTT. DIVISIONAL FIRE OFFICER / ASSISTANT CHIEF FIRE CONTROLLER (ACFC)

The ADFO / ACFC shall be the overall commander of all fire and emergency operations. In his capacity he shall have the following responsibilities.

- Assume overall charge during the progress of the emergency situation in and provide the required direction and co-ordination of all resources to bring the incident under control with minimum loss of life and damage to property.
- Organize reinforcement and support for emergency response from the resources available with the various response agencies and other mutual aid organizations.
- He shall communicate with his superior officer(s) as per protocol and keep them informed about the situation of the incident from time to time.
- He shall also alert the District level Officers concerned with District Disaster Response Plan and seek to operationalised the plan with the approval of Director of Fire & Emergency Services.

7. DIRECTOR / CHIEF FIRE CONTROLLER (CFC)

- The Director of Fire & Emergency Services (DFES) shall be in overall command whenever he is present at an incident site or his supervision / guidance has been requested.
- The DFES shall alert higher levels in Administration in the event of high risk events bordering on calamity /disaster, so as to trigger appropriate response at that level.

NATIONAL DISASTER RESPONSE FORCE

ABOUT NDRF

Two national calamities in quick succession in the form of Orissa Super Cyclone (1999) and Gujarat Earthquake (2001) brought about the realization of the need of having a specialist response mechanism at National Level to effectively respond to disasters. This realization led to the enactment of the DM Act on 26 Dec 2005. The NDMA was constituted to lay down the policies, plans and guidelines for disaster management.

The DM Act has made the statutory provisions for constitution of National Disaster Response Force (NDRF) for the purpose of specialized response to natural and man-made disasters. Accordingly, in 2006 NDRF was constituted with 08 Bns (02 Bn each from BSF, CRPF, ITBP and CISF). As on date NDRF is having strength of 10 Bns. Each NDRF Bn consists of 1149 personnel. Union cabinet has also approved the conversion/up-gradation of 02 Bns from SSB.

The force is gradually emerging as the most visible and vibrant multi-disciplinary, multi-skilled, high-tech, stand alone force capable of dealing with all types of natural and man-made disasters.

The DM Act, 2005 envisages a paradigm shift from the erstwhile response centric syndrome to a proactive, holistic and integrated management of disasters with emphasis on prevention, mitigation and preparedness. This national vision inter alia, aims at inculcating a culture of preparedness among all stakeholders.

NDRF has proved its importance in achieving this vision by highly skilled rescue and relief operations, regular and intensive training and re-training, capacity building & familiarization exercises within the area of responsibility of respective NDRF Bns, carrying out mock drills and joint exercises with the various stakeholders.

Vision of NDRF is to emerge as the most visible and vibrant multi-disciplinary, multi-skilled, high-tech force capable to deal with all types of natural as well as manmade disasters and to mitigate the effects of disasters.

ROLE AND MANDATE OF NDRF

- **Specialized response during disasters**
- **Proactive deployment during impending disaster situations**
- **Acquire and continually upgrade its own training and skills**
- **Liaison, Reconnaissance, Rehearsals and Mock Drills**
- **Impart basic and operational level training to State Response Forces (Police, Civil Defence and Home Guards)**

Vis-à-vis Community- All NDRF Bns are actively engaged in various:

- **Community Capacity Building Programme**

- **Public Awareness Campaign**
- **Exhibitions : Posters, Pamphlets, literatures**

UNIQUE FORCE

- **The only dedicated disaster response force of the world.**
- **The only agency with comprehensive response capabilities having multi-disciplinary and multi-skilled, high-tech, stand alone nature.**
- **Experienced paramilitary personnel specially trained and equipped for disaster response.**
- **Capabilities for undertaking disaster response, prevention, mitigation and capacity building.**

ORGANISATION

At present, National Disaster Response Force consists of ten battalions, three each from the BSF and CRPF and two each from CISF and ITBP. **Each battalion have 18 self-contained specialist search and rescue teams of 45 personnel each including engineers, technicians, electricians, dog squads and medical/paramedics.** The total strength of each battalion is 1,149. Union cabinet has also approved the conversion/up-gradation of 02 Bns from SSB. All the ten battalions have been equipped and trained to respond natural as well as man-made disasters. Four battalions of them are also trained and equipped for response during chemical, biological, radiological and nuclear (CBRN) emergencies.

LOCATIONS OF NDRF BNs

These NDRF battalions are located at ten different locations in the country **based on the vulnerability profile of country and to cut down the response time for their deployment at disaster site.**

6th Battalion of NDRF was raised CRPF campus Gandinagar on 23rd March 2003 as general duty battalion of CRPF and converted as National Disaster Response Force Battalion w.e.f. 19th January 2006.

AREA OF RESPONSIBILITY OF 6BN NDRF IS UNDER:

- ➔ **Rajasthan**
- ➔ **Madhya Pradesh**
- ➔ **Gujarat**
- ➔ **Daman & Diu.(UT)**
- ➔ **Dadra and Nagar Haveli (UT)**

6BN has 18 Search & Rescue team. Out of which 12 SAR team are pressed in to service during the operation and 06 team are kept reserve for training, leave, Administrative duties etc.

STANDARD OPERATING PROCEDURE OF A FIRE SERVICES IN CASE OF FIRE OR DISASTER.

1. FIRE/EMERGENCY OR RESCUE CALL:

Control Room In-Charge receives the fire/emergency call through telephone or other message of communication, Control room in charge inform the duty In charge with details of address and other information received by him. Thereafter, duty in charges simultaneously informs the Station In charge.

2. TOURN OUT:

The duty In charge along with water tender and duty crew leave the fire station followed by an ambulance.

3. REACHING AT THE SCENE OF FIRE:

On reaching at the scene of fire, at first instance, the crew will start fire fighting operation meanwhile officer In charge ask details information of premises to presence responsible person and thereafter considering velocity of the fire or disaster, the Officer In charge shall inform the control room to acquaint the Station In charge and Director of Fire & Emergency Services along with details of Fire Call/Disaster and also intimate the Control Room to inform other utility services such as Police, Water Supply, Ambulance Service, Medical and Health, Electricity, Local Transport undertaking, Gas Authority, Inspector of Factories, Airport Authority, Port Authority and other relevant Govt. department.

4. INFORMATIVE MESSAGE:

Officer In Charge shall also inform the control room regarding the type of fire/disaster and other details, etc.

5. RE-INFORCEMENT MESSAGE:

If, required the In Charge of the operation shall also intimate the Control Room for the In turn out and call for other neighboring Fire Services for assistance, etc.

In the mean time the Fire Services shall also carry out the rescue operations and shifting of casualties if any due to Fire/Disaster to the hospital and also carry out the salvage operation.

6. FIRE/DISASTER OUT MESSAGE:

On completion of fire fighting operation the Officer In Charge shall inform the control room that the operation is over.

7. RETURN BACK TO STATION:

After completion of entire operation, the duty crew shall return – back to the station also sent-back the other agencies.

8. REACHING BACK TO FIRE STATION:

After reaching back to fire station, the crew shall clean and wash all the equipments/appliances and check fuel and oil of the vehicles and then report to the Station Fire Officer that the appliances is ready for next call.

DISASTER MANAGEMENT

NATURAL AND MANMADE DISASTER

Likely Fall Outs a Disaster

1. Failure of services like Electricity, Water Supply, Telephone, Health services.
2. Large Scale Casualties.
3. Polluted Air and / or Water.
4. Disrupted City Life.
5. Shortage of food supply.
6. Shortage of cooking gas.
7. Mental Agony.
8. Severe Stresses.

Natural Disaster

Any occurrence that causes damage, economic destruction, loss of human life and deterioration in health and health services on a scale sufficient to warrant an extraordinary response from outside the affected community or area.

Natural Disaster Likely to be Encountered

1. Earthquake.
2. Flood
3. Cyclone
4. Tornadoes
5. Hailstorm
6. Epidemics

Man Made Disaster

Any occurrence such as large fire, building collapse, Leakage of chemicals that are hazardous to life, bomb blasts, communal riots, road and train accidents and plane crash at airport or in the habitable area that causes damage, economic destruction, loss of human life, and deterioration in health and health services on a scale sufficient to warrant an extraordinary response from outside the affected community or area.

Likely Fall Outs of Man Made Disaster

1. Failure of services like Electricity, Water Supply, Telephone, Large scale Casualities.
2. Damage to property.
3. Disrupted Life.
4. Loss of Business.
5. Delay in Returning to normal life.
6. Mental Agony.
7. Severe Stresses.

MANAGEMENT

Preparing your family to face Disasters

Each family must talk frankly about the disasters and their affects at their place, be mentally prepared to live without amenities for some time, to sustain stresses due to injuries to loved ones and damage to their property, and the ways to help themselves and the community. A family preparedness plan may help you avoid injury and panic following a disaster.

Family Preparedness Plan

1. Identify possible disaster that are likely at your place and explain their affects to each of the family members.
2. Learn community warning signals and the actions you should take when they are activated.
3. Display a list of important telephone numbers in your home and at your work place.
4. Establish meeting place inside and outside your home and outside neighbourhood. Make sure everyone knows when and how to contact each other if separated.
5. Decide on best two escape routes from your home and keep them on obstructed at all times.
6. Plan to take care of your pets, if any.
7. Identify high-risk area (areas having LPG cylinders, Refrigerators, Air conditioners, liquid fuel such as kerosene) in your home that calls for immediate action.

Disaster Kit

Each family should have a survival kit to help them during any crisis following disaster and kept at a convenient place known to all the family members. The kit must include:

1. Torch with extra batteries/candles/match boxes.
2. Pocket radio with extra batteries.
3. First-aid kit.
4. Common medicines
5. One set of clothing for each member of family in accordance with weather.
6. Few bed sheets/blankets.
7. Drinking water (5 liters per person per day for three days).
8. Dry food stuff, Milk powder, and Glucose or Electrol powder.
9. Soap, toothpaste, toothbrush, and towels.
10. Plastic bags, plates, glass/tumbler, utility knife, paper and pencils.
11. Emergency tools, an extra set of car keys and a credit card or cash.
12. Special items for infant, elderly, or disabled family members.

EARTHQUAKE

What to do?

Before an Earthquake

1. Attach shelves, gas cylinders, vases and flower pots to the walls of your home.
2. Place heavy or bulky objects on the floor or on the lowest shelves.
3. Teach all members of your family how to turn off the electricity, water and gas supply.

During an Earthquake

1. Keep calm and keep others calm.
2. If you are at home or inside a building or auditorium:
3. Protect yourself by staying under the lintel of an inner door, in the corner of a room, under a table or even under a bed.
4. If you are in the street:
5. Walk towards an open place, in a calm and composed manner. Keep away from buildings, especially old, tall or detached buildings, electricity wires, slopes and walls, which are liable to collapse.
6. If you are driving:
7. Stop the vehicle away from building, walls, slopes, electricity wires and cables, and stay in the vehicle.

After an Earthquake

1. Keep calm, switch on the transistor radio and obey any instructions you hear on the radio.
2. Keep away from low banks of rivers. A huge wave may sweep it.
3. Expect aftershocks.
4. Turn off the water, gas and electricity.
5. Use a torch.
6. If there is a fire, try to put it out. If you cannot, call the fire brigade.
7. Eat something. You will feel better and more capable of helping others.
8. If your home is badly damaged you will have to leave it. Collect your disaster kit.

What not to do?

During an Earthquake

1. Do not run and do not wander round the streets.
2. Do not rush to the doors or exits; never use the lifts; keep well away from windows, mirrors, and furniture.
3. Do not smoke and do not light matches or use a cigarette lighter.
4. Do not turn on switches. There may be gas leaks or short-circuits.
5. If people are seriously injured, do not move them unless they are in danger.
6. Immediately clean up any inflammable products that may have spilled (alcohol, paint, etc.)
7. If you know that people have been buried, tell the rescue teams. Do not rush and do not worsen the situation of injured persons or your own situation.
8. Avoid places where there are loose electric wires and do not touch any metal object in contact with them
9. Do not drink water from open containers without having examined it and filtered it through a sieve, a filter or an ordinary clean cloth.
10. Do not re-enter badly damaged buildings and do not go near damaged structures.
11. Do not walk around the streets to see what have happened. Keep clear of the streets to enable rescue vehicles to pass.

FLOOD

During flood:

1. If advised to evacuate, do so immediately.
2. Move to a safe area before access is cut off by flood water.
3. Avoid areas subject to sudden flooding.
4. If you come upon a flowing stream where water is above your ankles, STOP! Turn around and go another way.
5. Do not attempt to drive over a flooded road. The depth of water is not always obvious. The road bed may be washed out under the water, and you could be stranded or trapped.
6. Children should NEVER play around high water, storm drains, viaducts, or arroyos.

After the Flood:

1. If fresh food has come in contact with flood waters, throw it out.
2. Boil drinking water before using. Wells should be pumped out and the water tested for purity before drinking. If in doubt, call your local public health officer.
3. Seek necessary medical care at the nearest hospital.
4. Do not visit disaster areas. Your presence might hamper rescue and other emergency operations.
5. Electrical equipment should be checked and dried before being returned to service.
6. Use flashlights, not lanterns, torches or matches, to examine buildings. Flammables may be inside.
7. Report broken utility lines to appropriate authorities

BUILDING COLLAPES

Numerous recent disasters, in several parts of the world, should alert us to the fact that people are going to be trapped under buildings and other structures. The very nature of our technologically sophisticated and "growing taller" society continually increases the likelihood that this sort of calamity will occur. Current construction trends and population increases seem to continually expand the risks as people move further up from the ground. With the advent of the "High-Rise" buildings comes the very real concern of a "building collapse". The building can collapse in two ways i.e. either by an explosion or by an implosion.

In the case of explosion, either caused by an outward rush of force caused by natural (as during earthquake or an explosion in the building), or chemical forces, the building will collapse in an "outward" direction. A tornado or hurricane can "scatter" building parts for several hundred meters or even farther, when it causes a building(s) to collapse.

With implosion, the building will collapse into itself. It is a technique that is used by demolition specialists to minimize the spread of debris when purposely demolishing buildings. This type of collapse is likely to be caused when interior weight bearing elements of structures fail. Such a situation may arise during a major fire, heavy rains or explosion in the adjoining building.

CHEMICAL LEAKS

The inhalation, injection and injection of toxic, corrosive, radioactive materials and poisonous chemicals beyond certain limits is a potential threat to life. Many of the hazardous materials are flammable in nature and liberate toxic/poisonous fumes/vapours/products of combustion when leaks or involved in fire. The contact with chemicals may cause skin burns.

What to do?

1. Inquire about the characteristics of chemicals from the manufacturer such as toxic properties, flammability and their affect on skin and eyes, you are storing and or processing. And their antidotes.
2. Make information known to all around you and display the names of chemicals and their characteristics at the entrance of your premises.
3. Use protection for skin, eyes while handling hazardous chemicals.
4. Leave quietly the place in upwind direction where chemicals have accidentally released.
5. Once out of building/area due to leakage of chemicals, stay away till the area /building is declared safe for occupancy.
6. Consult Doctor immediately.

What not to do?

1. Do not hide information about the hazardous chemicals.
2. Do not handle chemicals without proper protection as recommended by the manufacturer.
3. Do not evacuate in downwind direction.
4. Do not panic and run that will cause inhalation of more quantity of fumes/vapours/gas due to fast breathing rate.
5. Do not drink or eat anything in the hazardous area nor ever use any food stuff that has been exposed to hazardous chemicals.

BOMB BLASTS

What to do?

1. Take shelter behind any wall or solid screen.
2. Lie down on the ground and protect your head with hands.

What not to do?

1. Do not run around in panic
